Auto Heating And Air Conditioning

The air conditioning system in your car is comprised of a compressor, condenser, expansion valve and evaporator. If you have ever used a can of compressed air to clean computer components, you will know that the bottle gets very cold in a short amount of time. This is due to the rapid expansion of the compressed gas.

Auto Heating and Air Conditioning, 5th Edition

The auto A/C system additionally offers a double function of working your defrost in the winter. Heating systems are comprised of a heater core which acts like a little radiator behind the dash, fan, and hoses which draw the heat from the engine to the core. Auto A/C systems operate similarly, by delivering coolant to the fan to blow cold air ...
