While external suppression should be connected when a GTX-327 is installed into an aircraft with a DME, the GTX-327 suppression input/output is not compatible with the Bendix/King KN-62, KN-64, and KNS-80. These DMEs have an output only suppression port and can be damaged by the GTX-327 mutual suppression output.

BENDIX/KING KN 62/62A/64 Rev 7, November/2004 00144I06.TDC Page 1-3 1.3.1 DME CHANNEL SOURCES The KN 62/62A/64 can be channeled by the internal channeling tuning knobs or it may be channeled by an external source. The KN 62/62A/64 will accept external channeling in the form of Shifted BCD, ARINC 2X5, or Bendix/King Slip code.

### **KN62IM - MAFC - Home**

Both the KN 62A and KN 64 can be channeled remotely through almost any NAV receiver or tuned directly with their own frequency selection knobs. They even have dual channeling capability, making two DME frequencies available to you at all times - one remote with one stored internally. So what you have, in effect, is a functional DME Hold Mode.

### **KN 62A - BendixKing**

The KN 62A and KN 64 have an audio output for use in identifying the DME ground station being received. The audio level is preset at the factory, but may be easily adjusted through the top cover. The unit electronically converts to distance the elapsed time required for signals to travel to and from the ground station.

During the Bendix and King merger (i.e. Bendix/King), a new part numbering system was created that converted these 9 digit part numbers to 12 digits. Therefore, 066-3056-01 became 066-03056-0001. Despite this numbering change, units that were originally from the King Radio design still have the 9 digit part number format on the unit dataplate.
