Accounts payable and Accounts receivable modules are two important execution modules under finance segment of an ERP system. Financial relationship with vendors who are providing input to the organization in the form of goods and services are maintained in Accounts Payable (AP) module. On the flip side, the financial connection with customers who use output of the organization, are dealt through Accounts receivable (AR) module.

budget offices and public accounts  
committees.

Internal controls are a framework of policies, procedures, analysis and strategies put in place by an organization to prevent fraud, ensure the veracity and reliability of financial and accounting information and to protect the organization's financial assets including - but not limited to - its cash flow. When it comes to accounts payable, not only do strong internal controls help prevent improper and duplicate payments, they tend to lead to a more efficient procure-to-pay
