This book covers topics from the ACCP Pulmonary Board Review Course 2007, offering a self-study resource to prepare for the subspecialty board examination in pulmonary disease.

This book covers topics from the ACCP Pulmonary Board Review Course 2007, offering a self-study resource to prepare for the subspecialty board examination in pulmonary disease.

"This book is designed to deliver combat casualty care information that will facilitate transition from a continental US or civilian practice to the combat care environment. Establishment of the Joint Theater Trauma System and the Joint Theater Trauma Registry, coupled with the efforts of the authors, has resulted in the creation of the most comprehensive, evidence-based depiction of the latest advances in combat casualty care. Lessons learned in Operation Enduring Freedom (OEF) and Operation Iraqi Freedom (OIF) have been fortified with evidence-based recommendations to improve casualty care. The educational curriculum was designed overall to address the leading causes of preventable death and disability in OEF and OIF. Specifically, the generalist combat casualty care provider is presented requisite information for optimal care of US combat casualties in the first 72 to 96 hours after injury. The specialist provider is afforded similar information, supplemented by lessons learned for definitive care of host nation patients."--

Straight from the ACCP Critical Care Board Review Course 2007, this syllabus covers every topic in a concise, easy-to-use format. The CD-ROM contains the content of the book, plus you can search and navigate for the precise information you need. Use to prepare for the critical care medicine subspecialty board examination.

This book provides in-depth analysis and guidance in the clinical diagnosis and treatment, and development of new treatments with clinical applied prospect of burn and trauma associated lung injury. It includes study on the pathological change of burn and trauma associated lung injury such as inhalation injury, lung blast injury, pulmonary barotrauma, delayed hemopneumothorax, lung injury associated sepsis, ventilator-induced lung injury and ischemia-reperfusion lung injury. It is also compiled with many clinical typical cases, full data and series of pictures. It also aims at bringing more clinicians' attention to burn-/trauma-induced lung injury, making them familiar with the relevant theories and clinical diagnose; guiding the treatment of burn and trauma associated lung injury and improving the prognosis and life quality of patients; stimulating more clinicians and researchers to further explore the pathological mechanism and new treatments of burn and trauma associated lung injury. It persists in combining theory and practice, and highlights practical application to reflect the theoretical value. It is very suitable for the medical teaching and can also be used as a reference book for medical doctoral students, postgraduates, and medical trainees receiving continuing education from critical care medicine, burn & trauma surgery, and emergency medicine.

"The Cleveland Clinic Cardiology Board Review, 2nd Edition, continues to offer thorough preparation for board certification and recertification exams in cardiology. It is written by distinguished clinicians from the Cleveland Clinic Foundation's Department of Cardiovascular Medicine and based on the Cleveland Clinic Foundation's popular annual Intensive Review of Cardiology course.The book provides a comprehensive, state-of-the-art review of every area of contemporary cardiovascular medicine. Emphasis is on board relevant clinical material and accurate real-world clinical decision making. More than 400 illustrations and numerous tables facilitate quick review. Board-format questions with answers and explanations appear at the end of each section. New for this edition: 4 color added throughout highlighted key points/critical issues surrounding guidelines. Online companion website with a component of online clinical cases with questions"--Provided by publisher.

Praise for the First Edition "As everyone in oncology fellowship training knows, there is a huge [information] gap in this field. Most oncology books are massive and loaded with information...by the time the book is [published]...it is outdated." [Tumor Board Review] is fresh and just out of the oven...I haven't seen any book in oncology like this so far...I think my investment in this book was wise and worth it." — Humaid Al-Shamsi, MB(Hon), BMedSc, MRCP(UK), FRCP, FACP, Assistant Professor, The University of Texas, MD Anderson Cancer Center Culling the knowledge and expertise of respected oncology specialists, this is a concise yet comprehensive review of all areas of oncology practice for medical oncologists, radiation oncologists, and pathologists — both students and practitioners. The second edition of Tumor Board Review has been thoroughly revised to encompass recent scientific advances in assessment and treatment, new clinical guidelines, and new FDA-approved drugs and indications. It also contains approximately 250 multiple-choice questions and answers to assist readers in testing their knowledge, especially those preparing for the MOC exam. The book features case presentations and evidence-based management discussions that clearly demonstrate how to apply new information in daily practice. In a consistent format, each chapter addresses epidemiology, risk factors, natural history, and pathology of each major organ-specific tumor type; an abbreviated display of relevant staging; and several "tumor board style" illustrative patient case studies. This is followed by an evidence-based case discussion, which reinforces current guidelines and explains the rationale for the diagnostic and therapeutic steps taken. Algorithms and decision-tree graphics further illuminate the decision process. NEW TO THE SECOND EDITION OF TUMOR BOARD REVIEW: Presents the most recent guidelines and management standards in user-friendly format Focuses on current indications, use of new drugs, and new treatment of side effects Includes new FDA-approved drugs and guidelines Offers approximately 250 multiple-choice questions and answers
