rooms, provided sexual favors, and filled military ranks. Placing working men and women at the center of the long history of the U.S. empire, these essays offer new stories of empire that intersect with the “grand narratives” of diplomatic affairs at the national and international levels. Missile defense, Cold War showdowns, development politics, military combat, tourism, and banana economics share something in common—they all have labor histories. This collection challenges historians to consider the labor that formed, worked, confronted, and rendered the U.S. empire visible. The U.S. empire is a project of global labor mobilization, coercive management, military presence,

Together, the essays in this volume recognize the United States as a global imperial player whose systems of labor mobilization and migration stretched from Central America to West Africa to the United States itself. Workers are also the key actors in this volume. Their stories are multi-vocal, as workers sometimes defied the U.S. empire's rhetoric of civilization, peace, and stability and at other times navigated its networks or benefited from its profits. Their experiences reveal the gulf between the American 'denial of empire' and the lived practice of management, resource exploitation, and military exigency. When historians place

Heart of Darkness is a short novel by Polish novelist Joseph Conrad, written as a frame narrative, about Charles Marlow's life as an ivory transporter down the Congo River in Central Africa. The river is "a mighty big river, that you could see on the map, resembling an immense snake uncoiled, with its head in the sea, its body at rest curving afar over a vast country, and its tail lost in the depths of the land." In the course of his travel in central Africa, Marlow

The story is a complex exploration of the attitudes people hold on what constitutes a barbarian versus a civilized society and the attitudes on colonialism and racism that were part and parcel of European imperialism. Originally published as a three-part serial story, in Blackwood's Magazine, the novella Heart of Darkness has been variously published and translated into many languages. In 1998, the Modern Library ranked Heart of Darkness one of the hundred best novels in English of the twentieth century.

This truly global text for the world history survey course employs fundamental themes of “environment and technology” and “diversity and dominance” to explore patterns of humans' interactions with their surroundings and with each other. The authors' approach reveals how humanity continues to shape and be shaped by the environment and how dominant structures and traditions are balanced and challenged by alternate beliefs. Special emphasis is given to technological development and how it underlies all human activity. Highly acclaimed in their

As they reimagined empire during the two world wars, decolonization was compromised. Priya Satia shows how these historians not only interpreted the major political events of their time but also shaped the future that followed. Satia makes clear that historical imagination played a significant role in the unfolding of empire. History emerged as a mode of ethics in the modern period, endowing historians from John Stuart Mill to Winston Churchill with outsized policymaking power. At key moments in Satia's

Braided with this story is an account of alternative visions articulated by anticolonial thinkers such as William Blake, Mahatma Gandhi, and E. P. Thompson. By the mid-twentieth century, their approaches had reshaped the discipline of history and the ethics that came with it. Against the backdrop of enduring global inequalities, debates about reparations, and the crisis in the humanities, Satia's is an urgent moral voice.

Yet most cultural critics continue to see these phenomena as separate. Edward Said looks at these works alongside those of such writers as W. B.
