Answers: a, b, d, e Furosemide is a potent diuretic, especially when given via IVP, and may cause the loss of electrolytes such as magnesium, sodium, and potassium. These electrolytes will need to be supplemented if the levels are low. In addition, furosemide may increase serum glucose levels, which is an issue, considering that M.G. has diabetes.

A collection of case studies for nursing students and practitioners offers 148 examples that foster creative thinking skills in medical-surgical, pediatric, maternity and psychiatric situations.

Develop your critical thinking and clinical reasoning skills with 150 realistic case studies from the four major clinical practice areas: medical-surgical, pediatric, maternity, and psychiatric/mental health nursing. Each case covers a common problem, drawn from actual clinical experiences and written by nurses who are clinical experts. All cases have been thoroughly updated and revised to reflect current clinical practices, with integrated content on pharmacology, nutrition, and diagnostic/laboratory tests to encourage you to think critically about all aspects of care. This fifth edition also features an increased emphasis on patient management, and new documentation and communication exercises. Plus new NCLEX® Examination format-questions help you prepare for success on the NCLEX® Examination and provide safe, quality patient care. Three-part organization presents cases in three parts: 1) Medical-Surgical Cases; 2) Pediatric, Maternity, and Psychiatric Cases; and 3) Other/Advanced Cases, the latter covering key topics such as multi-system disorders and emergency situations. Realistic case study approach incorporates cases drawn from actual clinical experiences to help you identify changes, anticipate possible complications, and initiate therapeutic interventions. Increasing case complexity provides you with a foundation on which to build as you advance to more difficult cases. Two new pediatric case studies strengthen your ability to recognize and effectively manage common disorders presenting in pediatric patients. New NCLEX Examination-format questions have been added throughout, including multiple choice, prioritization/ordering, chart/exhibit, and dosage calculation questions. Increased number of higher-level questions requires clinical reasoning rather than simply memorizing and recalling information. An emphasis on patient management reinforces the type of clinical decision-making needed in the clinical setting as well as reflecting the type of questions on the latest NCLEX Examination. Over 25 new illustrations and graphics such as ECG strips, lab/diagnostic test reports, anatomical diagrams, and medication labels are now interwoven throughout the book. New documentation and communication exercises ask you to document relevant patient information or to use the "SBAR" communication technique to communicate patient findings to the physician.

Highly regarded for its clinically relevant and thought-provoking content, Winningham's Critical Thinking Cases in Nursing, 6th Edition features 150 case studies that cover all four clinical practice areas: medical-surgical, pediatric, OB/maternity, and psychiatric nursing. Each case covers a common patient problem, drawn from actual clinical experiences and written by nurses who are clinical experts. This edition reflects the most current standards of clinical practice, including content on pharmacology, nutrition, and diagnostic/laboratory tests to prepare you for all aspects of patient care. From nursing educators Mariann Harding and Julie Snyder, this workbook helps you develop your clinical nursing judgment and bridge the gap from nursing knowledge to nursing practice. Comprehensive case study approach uses cases drawn from actual clinical experiences to help you identify changes, anticipate possible complications, and initiate therapeutic interventions. Progressive case complexity builds on previous learning and helps you develop more and more expertise. 150 case studies cover all major clinical areas, including medical-surgical, pediatric, OB/maternity, and psychiatric cases, providing you with many diverse clinical situations and opportunities to apply knowledge and develop critical thinking skills. Body system organization makes the book easier to use with medical-surgical nursing textbooks and courses. NEW! QSEN icons highlight essential safety content. NEW! Increased emphasis on NCLEX® Exam-style alternate-format questions includes multiple-response, prioritization, and illustration-based questions, offering better NCLEX Examination preparation. NEW! Additional documentation questions and a NEW Chart View design provide more experience in documenting patient care based on real-world electronic chart formats. NEW! Reorganized format presents cases in three parts: 1) medical-surgical cases; 2) pediatric, maternity, and women's health cases; and 3) psychiatric and alternative therapies cases. NEW! Increased difficulty level includes more questions about care of older adults and multi-system situations. UPDATED content includes the latest clinical treatment guidelines, issues, and practice standards.

"Features 150 case studies that cover all four clinical practice areas: medical-surgical, pediatric, OB/maternity, and psychiatric nursing. Each case covers a common patient problem, drawn from actual clinical experiences and written by nurses who are clinical experts. This edition reflects the most current standards of clinical practice, including content on pharmacology, nutrition, and diagnostic/laboratory tests to prepare you for all aspects of patient care."--Publisher

This work is designed to help students, through the use of case studies, gain the necessary experience that bridges the gap between knowledge and clinical practice and stimulates critical thinking. The cases are drawn from actual clinical experiences.

Detailed and up-to-date, this new second edition offers practical case studies covering a wide variety of critical care problems. Each features questions and answers to help readers sharpen their critical-thinking skills and prepare for the CCRN exam. It features new chapters on blunt abdominal trauma and abdominal aortic aneurysm, and updated case studies reflect new treatment modalities and current critical care pharmacology.

Based on a philosophy of active learning, this innovative and refreshing study aid is designed to help students learn the fundamentals of maternal-child nursing through unfolding case studies. Nursing content is woven into vivid case vignettes that evolve over time, thus engaging students and helping them develop critical thinking and clinical decision-making skills. The text also serves as a comprehensive workbook for students preparing for the NCLEX-RN®. It is the only maternal-child nursing review text to integrate content with practice and professional responsibilities to foster an engrossing real-world learning experience. The case vignettes are based on actual cases and incorporate all core content topics (assessment, planning, intervention, and evaluation of patient care) for maternal-child nursing and NCLEX-RN® success. The book includes multiple choice, matching, true/false and calculation questions, each related to the unfolding clinical situation. Exercise answers with rationale appear at the end of each chapter. References at the end of the book facilitate self-remediation. Nurse-educators will also find this resource helpful for simulation experiences, classroom cases, group projects, and clinical conferences. Key Features: Reviews maternal-child nursing core content for course learning and test review prep, as well as for NCLEX-RN® success Uses unfolding, real-life case vignettes to integrate core content with practice and professional responsibilities Covers all types of NCLEX-style questions for greater test familiarity Incorporates online resources for use in clinical settings Develops critical thinking skills to help students "think like a nurse"

Helping today's nursing professional acquire essential critical thinking skills for solving both common and more complex health problems, this innovative and insightful workbook contains 92 real-life cases which address all aspects of nursing care (i.e., assessment, analyzing data, planning care, evaluating benefits and possible consequences of care), and demonstrate the cognitive and affective components that influence critical thinking. KEY TOPICS: Contains an introduction to critical thinking, an historical overview of critical thinking, and an in-depth discussion on the affective and cognitive components of critical thinking. Uses critical thinking language throughout; bases all material on critical thinking theory; and fosters both attitude and cognitive critical thinking within each case. Organizes case studies by major nursing specialties--adult health, community and home-care, maternal-newborn, pediatrics, and mental health nursing--and presents many activities and questions within each case to stimulate critical thinking skills. Includes practice sessions, detailed chapter summaries, and a book/Internet link that provides regularly updated material. MARKET: For nurses specializing in adult health, community and home-care, maternal-newborn, pediatrics, and mental health.

Tap into 150 unique case studies covering all four clinical practice areas: medical-surgical, pediatric, OB/maternity, and psychiatric nursing, all newly organized to facilitate a conceptual approach to teaching and learning. Each case covers a common patient problem, drawn from actual clinical experiences and written by nurses who are clinical experts. Cases include integrated content on pharmacology, nutrition, and diagnostic/laboratory tests to encourage you to think critically about all aspects of patient care. The 7th edition features a new concept-based organization, an enhanced focus on interprofessional collaboration and QSEN, 20 all-new case studies, and updated content throughout to reflect the most current standards of clinical practice.

Reflecting the latest practices in the field, Clinical Decision Making: Case Studies in Medical-Surgical Nursing, 2nd edition bridges the gap between classroom knowledge and clinical application. Emphasizing holistic nursing care, this resource helps nursing students sharpen their critical thinking skills and gain experience applying what they have learned. The more than 40 medical-surgical case histories and related questions, and responses are based on real-life client situations. Every case contains an introductory blueprint of variables that must be considered while evaluating a particular scenario concerning the client, nursing protocol, and setting of care. Each blueprint and case is different, just as each clinical situation is unique. As learners simulate the actual decision-making process, they gain valuable experience making informed clinical judgments that will help them become successful nurses. Categorized by complexity, the book appeals to a broad range of learning levels and styles.
