This shared many components from the 3.6 V8, and the 4.2 unit was identical to the optional V8 used in the Audi S4 (aka Ur-S4), sharing the same rated outputs and ABH identification code. “ I don ’ t translate, I create! ” – This is the slogan of a translation agency called “ Sternkopf Communications ” located in Fl ö ha, Germany. The translators at this translation agency

Access Free Audi 4 2 Liter

are specialized in the field of marketing and perceive creativeness their daily bread. But what does this actually mean – I don ' t translate, I create? Undoubtedly, the translation of a text from one language into another is not an easy and straightforward process. On the contrary, the translator needs to

Access Free Audi 4 2 Liter

invest much time and one or the other headache before a target text (TT) finally sounds natural, fluent, coherent and logical for the target audience. Different possible translation solutions will have to be considered, language as well as culture-related equivalents often are not easily at hand etc. Would it not be pleasant if

Access Free Audi 4 2 Liter

machine translation
(MT) was there to help
with this process?

Nevertheless, as
promising as this may
sound, no machine or
software developed so far
is able to independently
produce TTs meeting the
standards of marketable
translations, despite
copious efforts to do so.
This just goes to show
how important the

Access Free Audi 4 2 Liter

human capacity of creativity in language and text production is for the translation process.

Without human creative thinking, TTs would, in fact, truly only read like translations, i.e.

mechanical

reproductions of the source text (ST) in a different code, rather than natural texts in their own right. Good

Access Free Audi 4 2 Liter

translations, however, distinguish themselves by not revealing their readership that they are “ merely ” renderings of the original text.

Hence, a slogan such as “ I don ’ t translate, I create ” , emphasizes the effort that is put into the translation process quite well, making the customers of Sternkopf Communications

Access Free Audi 4 2 Liter

instantly aware of the fact that their texts are in good hands and will eventually not read like mechanical translations but as if they were well-composed originals. Yet, despite the enormous importance of creativity in translating, computer-aided translation (CAT) tools are being used frequently by professional translators,

Access Free Audi 4 2 Liter

not to replace but to support the translator in their daily business. From the 1990s onwards, using CAT tools has been becoming increasingly popular for the following reason: They are said to help translators to achieve faster turnaround times by storing completed translations in a translation memory TM. In so doing, CAT

Access Free Audi 4 2 Liter

tools enable their users to translate in a more consistent way, since they search source texts for words, phrases or sentences that have already been translated before and stored in the TM so that the translator does not need to translate this text unit again ' from scratch ' .

Accordingly, this paper pursues two related

Access Free Audi 4 2 Liter

purposes. The first is to compare the different CAT tools in their degree of usability to gain an impression of which of these translation memory solutions is perceived to meet translators' technological requirements best. The second purpose is to identify translators' perspectives on uniformity and creativity

Access Free Audi 4 2 Liter

in translations with the goal to shedding light on the question whether CAT tools generally tend to positively or negatively influence the translation process on a rather linguistic than technological basis.
