The M10 continued through the E30's September 1987 facelift. The 316 continued on, while the fuel-injected M10 was rebadged as the 316i, freeing up the 318i name for the new M40 engine. But after just one year the 316 was dropped and the 316i received a smaller M40 engine, removing the M10 engine from the E30 range in September 1988.
