Futurist Faustian pact: 2075. Jeffrey Cooper, Alabama-raised design superstar in Americanized Germany, is 78 but looks 40 years younger due to the perks of his stressful job. Meeting an impulsive, gifted man will destroy the life he has painfully built for himself, but allow him to reclaim his own soul.

Given the overwhelming number of ineffective economic reform policies and programs, a central question for international development concerns how significant economic change happens. In the midst of this quandary, a puzzle has been growing quietly the last two decades. Vietnam has transitioned from a poor, centrally planned economy to one of the fastest growing, market economies in the world, despite ignoring conventional reform strategies. This book focuses on solving a specific puzzle of Vietnam's transition. Its fastest growing city, Ho Chi Minh City, has a real estate industry that ranks as the worst place in the world for private capital to invest. Nevertheless, entrepreneurs have emerged to form private firms within the first decade of transition. Where did these people come from? How could they conduct business in such an inhospitable economic environment? The book finds that the transition to capitalism is neither the natural propensity of individuals nor the decision of an all-powerful state nor necessarily requires a long, evolutionary process. The major, rapid, and discontinuous economic change that occurred in Vietnam was fundamentally enabled by a social reconstruction of cognitive paradigms. The new social

cognition framework accounts for why some firms were more successful than others as well as why Vietnam's capitalism has surprising characteristics.

A collection of stories-some well known, some more obscure-capturing some of the best storytelling of this golden age of nonfiction. An anthology of the best new masters of nonfiction storytelling, personally chosen and introduced by Ira Glass, the producer and host of the award-winning public radio program *This American Life*. These pieces-on teenage white collar criminals, buying a cow, Saddam Hussein, drunken British soccer culture, and how we know everyone in our Rolodex-are meant to mesmerize and inspire.

If you could live forever, would you want to? Both a fascinating look at the history of our strive for immortality and an investigation into whether living forever is really all it's cracked up to be. A fascinating work of popular philosophy and history that both enlightens and entertains, Stephen Cave investigates whether it just might be possible to live forever and whether we should want to. He also makes a powerful argument that it's our very preoccupation with defying mortality that drives civilization. Central to this book is the metaphor of a mountaintop where one can find the Immortals. Since the dawn of humanity, everyone - whether they know it or not-has been trying to climb that mountain. But there are only four paths up its treacherous slope, and there have only ever been four paths. Throughout history, people have wagered everything on their choice of the correct path, and fought wars against those who've chosen differently. In drawing back the curtain on what compels humans to "keep on keeping on," Cave engages the reader in a number of mind-bending thought experiments. He teases out the implications of each immortality gambit, asking, for example, how long a person would live if they did manage to acquire a perfectly disease-free body. Or what would happen if a super-being tried to

round up the atomic constituents of all who've died in order to resurrect them. Or what our loved ones would really be doing in heaven if it does exist. We're confronted with a series of brain-rattling questions: What would happen if tomorrow humanity discovered that there is no life but this one? Would people continue to please their boss, vie for the title of Year's Best Salesman? Would three-hundred-year projects still get started? If the four paths up the Mount of the Immortals lead nowhere—if there is no getting up to the summit—is there still reason to live? And can civilization survive? *Immortality* is a deeply satisfying book, as optimistic about the human condition as it is insightful about the true arc of history.

The natural history museum is a place where the line between "high" and "low" culture effectively vanishes--where our awe of nature, our taste for the bizarre, and our thirst for knowledge all blend happily together. But as Stephen Asma shows in *Stuffed Animals and Pickled Heads*, there is more going on in these great institutions than just smart fun. Asma takes us on a wide-ranging tour of natural history museums in New York and Chicago, London and Paris, interviewing curators, scientists, and exhibit designers, and providing a wealth of fascinating observations. We learn how the first museums were little more than high-toned side shows, with such garish exhibits as the pickled head of Peter the Great's lover. In contrast, today's museums are hot-beds of serious science, funding major research in such fields as anthropology and archaeology. "Rich in detail, lucid explanation, telling anecdotes, and fascinating characters.... Asma has rendered a fascinating and credible account of how natural history museums are conceived and presented. It's the kind of book that will not only engage a wide and diverse readership, but it should, best of all, send them flocking to see how we look at nature and ourselves in those fabulous legacies of the curiosity cabinet."--The Boston Herald.

Abel Casey is learning to juggle his life the Great Wolf with his life

as a human. His girlfriend Chrissy wants to take their relationship to the next step, but will Abel agree the timing is right? A trip to Paris, proves to be more than a vacation for Pru and Dolly. Pru and her new bodyguard Gus, find themselves face to face with vampires and Allie's new love. Oakley isn't overly enthused with someone else protecting the love of his life Pru. The pack will join forces with the O'Connell's to put a stop to the vampire's announcing to the world of their existence. The pack is fighting to protect each other and their secret world. Be prepared to stay up all night...

Immediate, intimate, portable and inexpensive, radio is the most pervasive medium in Australia. Changing Stations is the first full-scale, national history of commercial radio in Australia, from the experiments and schemes of the 1920s through to the eve of the introduction of digital radio in 2009.

The cataclysm began more than a century earlier, when the King of Ayr died before naming an heir to the throne, and damned his realm to chaos. The cold-blooded conspiracies of the Renne and the Wills—each family desirous of the prize of rule—would sunder the one kingdom, and spawn generations of hatred and discord. Now Toren Renne, leader of his great and troubled house, dreams of peace—a valiant desire that has spawned hostility among his kinsmen, and vicious internal plots against his life. In the opposing domain, Elise Wills's desire for freedom is to be crushed, as an unwanted marriage to an ambitious and sinister lord looms large. As always, these machinations of nobles are affecting the everyday lives of the common folk—and feeding a bonfire of animosity that has now trapped an unsuspecting young Valeman Tam and two fortune-hunting friends from the North in its high, killing flames. But the closer Toren comes to achieving his great goal of uniting two enemy houses, the more treachery flowers. Nobles and mystics alike conspire to keep the realm divided, knowing that only in times of strife can their power grow. And perhaps the source of an

unending misery lies before an old king's passing, beyond the scope of history, somewhere lost in a fog of myth and magic roiling about an ancient enchanter named Wyrff who bequeathed to his children terrible gifts that would poison their lives...and their deaths. It is a cursed past and malevolent sorcery that truly hold the land, its people, and its would-be rulers bound. And before the already savaged kingdom can become one again, all Ayr will drown in a sea of blood.

Maddy Wainright has given up on marriage - and men. After dating way too many losers who aren't capable of appreciating her for who she is, she's about ready to resign herself to a life of spinsterhood. Until her insanely rich boss Daniel Thorne comes along with an offer she simply can't refuse. He proposes a marriage of convenience - one that would allow Maddy to live in the lap of luxury for a year, and Mr. Thorne to stay in the country that has become his home. At the end of their arrangement, Maddy will walk away with a cool two million dollars. All she has to do is move into his mansion, put on a convincing show in public, and endure a few INS interviews, for which she will be thoroughly prepped. It's a big risk, but one Maddy might just be willing to take, considering the payoff. At first, it's all business. But when the gentle touches, passionate kisses, and lingering looks they have to give each other in public start spilling over into their private life, Daniel and his devious mind take Maddy to heights of pleasure she's never experienced. And the more she gets to know him, the more she feels that wistful tug in her chest every time he puts his arm around her in public. Before long, she finds herself wishing it were real. As time goes on, Maddy finds herself wondering if two million dollars will be enough to cover the cost of repairing a broken heart. But Mr. Thorne may have yet another secret in store...

The concept of the just war poses one of the most important ethical questions to date. Can war ever be justified and, if so, how? When

is a cause of war proportional to its costs and who must be held responsible? The monograph *Just and Unjust Wars in Shakespeare* demonstrates that the necessary moral evaluation of these questions is not restricted to the philosophical moral and political discourse. This analysis of Shakespeare's plays, which focuses on the histories, tragedies and Roman plays in chronological order, brings to light that the drama includes an elaborate and complex debate of the ethical issues of warfare. The plays that feature in this analysis range from *Henry VI* to *Coriolanus* and they are analysed according to the three Aquinian principles of legitimate authority, just cause and right intention. Also extending the principles of analysis to more modern notions of responsibility, proportionality and the *ius in bello*-presupposition, this monograph shows that just war theory constitutes a dominant theoretical approach to war in the Shakespearean canon.
