Dinosaurs: The Textbook 6, Lucas, Spencer - Amazon.com

Dinosaurs: A Concise Natural History is a genuine college textbook, complete with scholarly references and questions at the ends of chapters, intended as exercises for undergrads or graduate students, but fun for lay readers to tackle as well. It's also one of the most detailed, comprehensive, and readable overviews of dinosaurs you can buy, especially notable for its detailed classification of the different types of dinosaurs of the Mesozoic Era, and its authors (David E. Fastovsky and ...

This book is an introduction to dinosaurs, providing the basic concepts of biology and geology needed to understand dinosaur science--the main taxonomic groups, the origin and extinction of dinosaurs, and dinosaur behavior--as well as a discussion of dinosaurs in popular culture. --

Geared towards a broad variety of students, *Dinosaurs: The Textbook*, sixth edition, is a concise and lucid presentation of the biological and geological concepts of dinosaur science. It clarifies the evolution, phylogeny, and classification of the various species while modeling the best approach for navigating new and existing research. Revised to reflect recent fossil discoveries and the current consensus on dinosaur science, this text moves through the major taxonomic groups—including theropods, sauropodomorphs, ornithomorphs, ceratopsians, pachycephalosaurs, stegosaurs, and ankylosaurs—and concludes with updated chapters on the behavior and extinction of the dinosaurs, their biological relationship to birds, and their representation (or misrepresentation) in art, literature, film, and other forms of popular culture. The sixth edition represents a major revision of the leading text for an introductory course on dinosaurs, including comprehensive updates based on the latest scientific discoveries, research, and literature. With an extensive art program revised by leading paleoartists that features cutting-edge illustrations, it is a complete reader-friendly pedagogical package with extensive end-of-chapter summary tools, review questions, a detailed glossary, a dinosaur dictionary, and a comprehensive index. Please visit our supplemental materials page (<https://cup.columbia.edu/extras/supplement/dinosaurs-the-textbook-sixth-edition>) to find study and teaching aides for both students and teachers using *Dinosaurs: The Textbook*, sixth edition in class.

An accessible introduction to the study of dinosaurs that advocates an eclectic approach and places the scientific method at the crux of the studies. This book will balance scientific rigor with a lively text that shows how dinosaurs lived and died as well as what happened to them after they died. Body fossils, trace fossils and taphonomy will be themes. an accompanying web page for further information www.blackwell-science.com/dinosaurs chapter opening 'real life' problem used to introduce topic 'So What' section at chapter end to address significance of content to student scientific method integrated throughout trace fossil theme ethics highlighted throughout end chapter exercises Visit the Dinosaur website for web links and resources: <http://www.blackwell-science.com/dinosaurs>

The ideal textbook for non-science majors, this lively and engaging introduction encourages students to ask questions, assess data critically and think like a scientist. Building on the success of previous editions, *Dinosaurs* has been thoroughly updated to include new discoveries in the field, such as the toothed bird specimens found in China and recent discoveries of dinosaur soft anatomy. Illustrations by leading paleontological illustrator John Sibbick and new, carefully-chosen photographs, clearly show how dinosaurs looked, lived and their role in Earth history. Making science accessible and relevant through clear explanations and extensive illustrations, the text guides students through the dinosaur groups, emphasizing scientific concepts rather than presenting endless facts. Grounded in the common language of modern evolutionary biology – phylogenetic systematics – students learn to think about dinosaurs the way that professional paleontologists do.

The ideal textbook for non-science majors, this lively and engaging introduction encourages students to ask questions, assess data critically and think like a scientist. Building on the success of the previous editions, *Dinosaurs* has been reorganised and extensively rewritten in response to instructor and student feedback. It continues to make science accessible and relevant through its clear explanations and extensive illustrations. Updated to reflect recent fossil discoveries and to include new taxa, the text guides students through the dinosaur groups, emphasising scientific concepts rather than presenting endless facts. It is grounded in the common language of modern evolutionary biology - phylogenetic systematics - so that students examine dinosaurs as professional paleontologists do. The key emerging theme of feathered dinosaurs, and the many implications of feathers, have been integrated throughout the book, highlighted by the inclusion of stunning new photographs in this beautifully illustrated text, now in full colour throughout.

Peek inside a dinosaur egg, discover what dinosaurs really ate, and learn how dinosaur tracks are made - all in this awesomely illustrated book! *Dinosaurs for Kids* shares the unique world of dinosaurs and their true history like never before as you: meet the most unusual creatures to ever walk the earth, stalk the seas, or soar across the sky! discover how dinosaur bonebeds are made, and other kinds of fossils beyond just bones! learn the truth behind museum exhibits and flawed evolutionary timelines! Within these pages kids will uncover the facts about dinosaur history from the Creation to recent discoveries. Let Ken Ham take you on a journey through time to explore these awesome wonders of God's design. From where dinosaurs lived to what scientists assume they know about these great creatures, dinosaurs have never been this exciting, revealing and simply amazing! The 7 Fs of dinosaur history: formed, fearless, fallen, flood, faded, found, fiction.

This book provides pictures and brief facts about a variety of different kinds of dinosaurs.

"Dinosaurs and modern life collide in a very young picture book that clearly illustrates how big dinosaurs really were"--

This is a comprehensive 2005 book is simply the best textbook on dinosaurs available.

This text is intended for a one-quarter or one-semester introductory course on dinosaurs. *Dinosaurs: The Textbook* is a monument to our present understanding of these wonderful creatures. It is a book that will take the student on a journey through nearly every aspect of dinosaur biology, geology, and the history of their discovery. It is a text that presents facts together with current ideas, notions, and controversies. Dr. Lucas presents dinosaurs as successful, living creatures that were merely different in appearance from animals living today. Dr. Lucas has written a comprehensive book that is easily read and understood by students with little scientific background - a book that teaches students not only how to use scientific methods, but how to synthesize data to create their own ideas. In contrast with many dinosaur books from the past, Dr. Lucas, although indicating his own views, allows students the opportunity to think for themselves.
