Nasser offers a guide for Christians who want to learn to hear and see God in their everyday lives, focusing on how to listen and where to look.

Commemorating 75 years since the Empress of Crime's first book, the sixth volume in a set of omnibus editions presenting the complete run of 32 Inspector Alleyn mysteries.

The results of recent archaeological excavation, systematic rural survey and detailed studies of pottery distributions have revealed the extent and complexities of the economy in the eastern empire. The eight papers in this volume demonstrate this complexity and prosperity, examining several types of product and how the economy evolved over time. Contents: New Rome, new theories on Inter-regional exchange: East Mediterranean economy in Late Antiquity (Sean Kingsley and Michael Decker); Urban Economies of Late Antique Cyrenaica (Andrew Wilson); The economic impact of the Palestinian wine trade in Late Antiquity (Sean Kingsley); Food for an empire: wine and oil production in North Syria (Michael Decker); Beyond the amphora: non-ceramic evidence for Late Antique industry and trade (Marlia Mundell Mango); The economy of Late Antique Cyprus (Tassos Papacostas); LR2: a container for the military annona on the Danubian border? (Olga Karagiorgou); Specialization, trade and prosperity: an overview of the economy of the Late Antique Eastern Mediterranean (Bryan Ward-Perkins).

Experimental Thermodynamics, Volume II: Experimental Thermodynamics of Non-reacting Fluids focuses on experimental methods and procedures in the study of thermophysical properties of fluids. The selection first offers information on methods used in measuring thermodynamic properties and tests, including physical quantities and symbols for physical quantities, thermodynamic definitions, and definition of activities and related quantities. The text also describes reference materials for thermometric fixed points, temperature measurement under pressures, and pressure measurements. The publication takes a look at absolute measurement of volume and equation of state of gases at high temperatures and low or moderate temperatures. Discussions focus on volumes of cubes of fused silica, density of water, and methods of measuring pressure. The text also examines the compression of liquids and thermodynamic properties and velocity of sound, including thermodynamics of volume changes, weight methods, and adiabatic compression. The selection is a dependable reference for readers interested in the thermophysical properties of fluids.

Covers wide variety of subjects including literature, theology, history and language.
