The 10 Rules of Successful Nations offers a pithy guide to real-world economics, adapted from the New York Times bestseller The Rise and Fall of Nations. A wake-up call to economists who failed to foresee every recent crisis, including the cataclysm of 2008, The 10 Rules of Successful Nations is a slim primer full of pioneering insights on the political, economic, and social habits of successful nations. Distilled from Sharma's quarter century traveling the world as a writer and investor, his rules challenge conventional textbook thinking on what matters-and what doesn't-for a strong economy. He shows why successful nations embrace robots and immigrants, prefer democratic leaders to autocrats, elect charismatic reformers over technocrats, and pay no mind to the debate about big versus small government. He explains why rising stock prices matter as much or more than food prices, which measure of debt is the best predictor of economic crises, and why no one number can accurately capture the value of a currency. He also demonstrates how a close reading of the Forbes billionaire lists can offer the clearest real-time warning of populist revolts against the wealthy. Updated with brand-new data, 10 Rules reimagines economics as a practical art, giving general readers as well as political and business leaders a quick guide to the most important forces that shape a nation's future.

The world changed. People did not. Discover the technologies, events, and corporations that shaped the rich universe of Android and Android: Netrunner in The Worlds of Android, your definitive guide to a future marked by technological revolutions, extraterrestrial expansion, and new definitions of humanity. Gain new insight into the worlds greatest megacorps, learn how runners navigate the virtual world, and explore what it means to be human in an age of clones and true AI.

POWERI was told that I was weak as a kid My problems didn't matterI shattered into a million bits No direction I couldn't direct myself because I was powerlessAs I grewWho would tell me what to do? I've established the fabrics of life Finally being forced to be on my own I've learnedControl is not power I have the power to put my words into actionI can not control the everlasting reaction

A celebration of one of the most important groups of Renaissance paintings Titian (active 1506-1576) produced a masterful group of paintings for Philip II of Spain, celebrating the loves of gods, goddesses, and mortals. Depicting scenes from Ovid's narrative poem Metamorphoses, Titian named them "poesie" and considered the works as visual equivalents of poetry. This volume presents a detailed study of the complete series--Danaë, Venus and Adonis, Perseus and Andromeda, Diana and Actaeon, Diana and Callisto, and The Rape of Europa, as well as The Death of Actaeon--lavishly illustrated with details of these emotionally charged paintings. The book explores Titian's creative process and technique, in addition to his use of literary and visual sources and his correspondence with Philip II. The artistic legacy of the series for later European painting is also examined in the works of artists such as Rubens, Velázquez, and Rembrandt. Offering the most comprehensive overview of these remarkable works, Titian: Love, Desire, Death is an indispensable resource for scholars and admirers of Renaissance painting.
