Dosh Steam Engineer My favorite part about DigiLibraries.com is that you can click on any of the categories on the left side of the page to quickly see free Kindle books that only fall into that category. It really speeds up the work of narrowing down the books to find what I'm looking for.

The Malaysian economy has gone from the doldrums to being a juggernaut, which has posed many challenges to the health care industry especially hospitals. Public hospitals in Malaysia have faced an uphill task in upgrading health care services to levels compatible with international standards. In this book, Hong Poh Fan, a senior adviser on facility management for a hospital developer, explores the transition that public hospitals have undertaken with the support of the private sector. The author zeroes in on critical issues, including: successes and challenges of privatization implementation; hospital experiences in a Southeast Asian context and how those experiences can be applied elsewhere; and ways that private development of hospitals has changed over time as well as the rationale of privatization. When people think of what the hospital industry needs, they often focus on having enough doctors and nurses, but when facilities management is lacking, services can be compromised no matter how employees are working at a facility. Join the author as he shares lessons learned over a fifteen-year period of hospital privatization in this detailed examination of how to improve health care.

Organisations that lack a proper occupational safety and health practitioner or system are vulnerable workplaces. Think of your organisation as a football team and the occupational

safety and health practitioner as your goalkeeper. You could have the best players on your team but without a goalkeeper, your team will be “ battling ” without the last line of defence. This book provides an insight into the various theories on how accidents occur, the establishment of relevant laws and organisations, and the current applications of workplace safety measures. With case studies drawn from the authors ’ experience, this book also provides a brief overview of Malaysia ’ s laws and practices related to workplace safety and dedicates a chapter to mental health management in the workplace written by Dr Alvin Ng Lai Oon, Founding President of the Malaysian Society of Clinical Psychology.
