Mystery and intrigue surround Halloween night as friends surrender to long-hidden desires, lovers relinquish control, and the heat of passion threatens to consume them all... *Seducing Mr. Right* by Katee Robert Danielle has a plan—use the company Halloween party to seduce the sexy mail guy who works a few floors up who she's been meeting for coffee for the past few months. The only problem? He's not who she thinks he is, and he has seduction plans of his own. *Tempted by His Best Friend* by Cari Quinn Kindergarten teachers aren't known for breaking the rules, but Steph is ready to go undercover—and get under the covers—to work her magic on her best friend, Landon. Sexy costume necessary, multiple orgasms crucial, real identity optional. *Wicked Games* by Samanthe Beck When Stacy discovers her sex-on-a-stick ex at her Hollywood Halloween blow-out, she decides to show the cocky homicide detective exactly what he's been missing. But she's not the only one plotting revenge, and Ian's the only one who can save her. *Protecting What's Theirs* by Tessa Bailey Lieutenant Derek Tyler and Ginger Peet have overcome every seemingly impossible hurdle on the path to happiness, but when they each receive life-changing news on the same day, will their hard-won trust stand up to the test? Or will their attempts to shield one another drive them apart? Enjoy your tricks and treats in this sexy anthology featuring bestselling authors Katee Robert, Cari Quinn, Samanthe Beck, and Tessa Bailey.

More than twenty years have passed since Walter Auffenberg's monumental *The Behavioral Ecology of the Komodo Monitor*. In the intervening years the populations of Komodo dragons—native only to a handful of islands in southeast Indonesia—have dwindled, sparking intensive conservation efforts. During the last two decades new information about these formidable predators has emerged, and the most important findings are clearly presented here. A memoir from Walter Auffenberg and his son Kurt is followed by the latest information on Komodo dragon biology, ecology, population distribution, and behavior. The second part of the book is dedicated to step-by-step management and conservation techniques, both for wild and captive dragons. This successful model is a useful template for the conservation of other endangered species as well, for, as Kurt and Walter Auffenberg note, "The species may well indeed survive in the wild for generations to come while countless other organisms are lost."

This is just another one of those stories with killer robots, a giant monster from beyond time, evil toys, a mind control plot, sub-orbital death beams, kidnapers, bad movies, superpowered thugs, kidnapping, a megalomaniacal usurper, a maniacal genius hellbent on world domination, and an apocalypse. Not all at once, though. I mean, really, could you imagine coordinating the fight scene? Or reading it? You'd have to take notes just to keep track of who hit what and why.

"Most educators are skilled at planning instruction and determining what they will do during the course of a lesson. However, to truly engage students in worthwhile, rigorous cognition, a profound shift is necessary: a shift in emphasis from teaching to learning. Put another way, we know that whoever is doing the work is also doing the learning—and in most classrooms, teachers are working much too hard. Authors John V. Antonetti and James R. Garver are the designers of the Look 2 Learning model of classroom walkthroughs. They've visited more than 17,000 classrooms—examining a variety of teaching and learning conditions, talking to students, examining their work, and determining their levels of thinking and engagement. From this vast set of data, they've drawn salient lessons that provide valuable insight into how to smooth the transition from simply planning instruction to designing high-quality student work. The lessons John and Jim have learned from their 17,000 (and counting) classroom visits can't be wrong. They share those lessons in this book, along with stories of successful practice and practical tools ready for immediate classroom application. The authors also provide opportunities for reflection and closure designed to help you consider (or reconsider) your current beliefs and practices. Throughout, you will hear the voices of John and Jim—and the thousands of students they met—as they provide a map for shifting the classroom dynamic from teaching to learning."

Fea offers an even-handed primer on whether America was founded to be a Christian nation, as many evangelicals assert, or a secular state, as others contend. He approaches the title's question from a historical perspective, helping readers see past the emotional rhetoric of today to the recorded facts of our past. Readers on both sides of the issues will appreciate that this book occupies a middle ground, noting the good points and the less-nuanced arguments of both sides and leading us always back to the primary sources that our shared American history comprises.

DK Eyewitness Great Scientists is an exciting and informative guide to the fascinating lives of the world's most famous thinkers, philosophers, inventors, innovators and pioneers. Stunning photographs offer a unique "eyewitness" view of the ideas and innovations that have changed the way we live today. Your child will discover all about Benjamin Franklin's electrical charges, Albert Einstein's theory of relativity and the many others whose discoveries have shaped our world. Great for projects or just for fun, make sure your child learns everything they need to know about Great Scientists. Find out more and download amazing clipart images at www.dk.com/clipart.

This refreshing approach to the act of dreaming allows you to explore your full potential through the control of your dreams. It aches the reader how to construct dreams that will improve reality, and demonstrates how such dreams directly affect our lives.

The days of magic and adventure are fading away, giving way to the age of industry and science. As the aged last Hero sits upon the throne of Albion,

two friends—the privileged Thomas and his loyal servant, John— set out for the East in search of a legendary beast: the vicious, rarely-seen balverine. But their desire for adventure may be their ultimate undoing—because their quarry has just found them...

A clear-eyed look at the instrumental role drugs have played in our cultural, social, and spiritual development. • First American publication of the surprising European bestseller. • Examines everything from the ancient use of ergot and datura to the modern phenomenon of "designer" drugs such as Ecstasy and crack cocaine. From remotest antiquity to the present era of designer drugs and interdiction, drugs have played a prominent role in the cultural, spiritual, and social development of civilizations. Antonio Escohotado demonstrates how the history of drugs illuminates the history of humanity as he explores the long relationship between mankind and mind-altering substances. Hemp, for example, has been used in India since time immemorial to stimulate mental agility and sexual prowess. Aristotle's disciple Theophrastus testifies to the use of datura by the ancient Greeks and further evidence links the rites at Eleusis to the ingestion of a hallucinogen. Similar examples can be found in cultures as diverse as the Celts, the ancient Egyptians, the Aztecs, and other indigenous peoples around the world. Professor Escohotado also looks at the present-day differences that exist between the more drug-tolerant societies like Holland and Switzerland and countries advocating complete repression of these substances. The author provides a comprehensive analysis of the enormous social costs of the drug war that is coming under increasing fire from all levels of society. Professor Escohotado's work demonstrates that drugs have always existed and been used by societies throughout the world and the contribution they have made to humanity's development has been enormous. The choice we face today is to teach people how to use them correctly or to continue to indiscriminately demonize them. "Just say no," the author says, is not an option. Just say "know" is. Antonio Escohotado is a professor of philosophy and social science methodology at the National University of Distance Education in Madrid, Spain. He travels widely, offering lectures and seminars on the subject of drugs and history.

This publication establishes a basic understanding of materials used in civil engineering construction as taught in tertiary institutions across South Africa. It uses the objectives of the NQF in promoting independent learning and is the only book pertaining to Civil Engineering that covers all the necessary topics under one roof.
