Food Chemicals Codex. This book is a compendium of internationally recognized monograph standards and tests for the purity and quality of food ingredients, e.g., preservatives, flavorings, colorants, and nutrients. It is beneficial to the food industry because it provides quality standards used in agreements between suppliers and manufacturers in ongoing

regulatory authorities. This First Supplement to the Fourth Edition provides revisions and updates, reports on changes in tests and assays, and includes an errata section. The supplement also includes 15 new monographs -- including entries on three different whey products and an entry on the recently approved fat substitute Olestra -- plus 35 revised chemical monographs and a number of revised flavor monographs. Entries include physical and chemical descriptions of the ingredients, tolerable levels of contaminants, and more. In an improvement to the design of the
