

Read Free Fuzzy Graphs And Fuzzy Hypergraphs Studies In Fuzziness And Soft Computing

Fuzzy Graphs And Fuzzy Hypergraphs Studies In Fuzziness And Soft Computing

Recognizing the artifice ways to get this ebook fuzzy graphs and fuzzy hypergraphs studies in fuzziness and soft computing is additionally useful. You have remained in right site to start getting this info. get the fuzzy graphs and fuzzy hypergraphs studies in fuzziness and soft computing member that we have enough money here and check out the link.

You could buy lead fuzzy graphs and fuzzy hypergraphs studies in fuzziness and soft computing or get it as soon as feasible. You could quickly download this fuzzy graphs and fuzzy hypergraphs

Read Free Fuzzy Graphs And Fuzzy Hypergraphs

studies in fuzziness and soft computing after getting deal. So, gone you require the ebook swiftly, you can straight get it. It's so definitely simple and fittingly fats, isn't it? You have to favor to in this tell

It means the expansion of graph models
for the modeling complex systems. In case
of modelling systems with fuzzy binary
and multiarity relations between objects,
transition to fuzzy hypergraphs, which
combine advantages both fuzzy and graph
models, is more natural. It allows to realise

The fuzzy graph $H = (v, \mu)$ is called a partial fuzzy subgraph of $G = (V, \nu)$ if $v \subseteq V$ and $\mu \subseteq \nu$. Similarly, the fuzzy graph $H = (P, v, \mu)$ is called a fuzzy subgraph of $G = (V, \nu, \rho)$ induced by P if $P \subseteq V$, $v(x) = \nu(x)$ for all $x \in P$ and $\mu(x, y) = \rho(x, y)$ for all $x, y \in P$. For the sake of simplicity, we sometimes call H a fuzzy subgraph of G .

Fuzzy Graphs - SpringerLink

However, fuzzy hypergraphs are more advanced generalization of fuzzy graphs. Whenever there is a need to define multiary relationship rather than binary relationship, one can use fuzzy

Fuzzy Graphs and Fuzzy Hypergraphs :
John N. Mordeson ...

Intuitionistic fuzzy graphs and intuitionistic fuzzy digraphs are special cases of the intuitionistic fuzzy hypergraphs. Proof. An intuitionistic fuzzy graph on a set V is a pair $H = (V, E)$, where E is a symmetric intuitionistic fuzzy subset of $V \times V$. That is, $\mu_B: V \times V \rightarrow [0, 1]$ and for each x and y in V , we have $\mu_B(x, y) = \mu_B(y, x)$, $\nu_B(x, y) = \nu_B(y, x)$.

Some specific application areas presented from fuzzy graph theory are cluster analysis, pattern classification, database theory, and the problem concerning group structure. Applications of fuzzy hypergraph theory to portfolio management, managerial decision making with an example to waste management, and to neural cell-assemblies are given.
