Biochemistry 1st Canadian edition guides students through course concepts in a way that reveals the beauty and usefulness of biochemistry in the everyday world from a unique Canadian context. Biochemistry is a living science that touches every aspect of our lives and this book ensures students are made aware of the significance and interdisciplinary nature of this subject; questions posed at the beginning of each chapter and new "Why it Matters" boxes grab interest and tap into students inner 'scientist' answering why and how topics are relevant and important, "Human Biochemistry" features highlight how biochemistry affects our bodies, as well as "Critical Developments" sections focus on various types of drug design. Highlighting the most current research topics such as mRNA turnover and microRNA, as well as Canadian researchers and institutions, the 1st Canadian edition of Biochemistry will help students master the concepts of biochemistry and gain new insight into this dynamic science.

CD-ROM includes animations, living graphs, biochemistry in 3D structure tutorials.

Ninfa/Ballou/Benore is a solid biochemistry lab manual, dedicated to developing research skills in students, allowing them to learn techniques and develop the organizational approaches necessary to conduct laboratory research. Ninfa/Ballou/Benore focuses on basic biochemistry laboratory techniques with a few molecular biology exercises, a reflection of most courses which concentrate on traditional biochemistry experiments and techniques. The manual also includes an introduction to ethics in the laboratory, uncommon in similar manuals. Most importantly, perhaps, is the authors' three-pronged approach to encouraging students to think like a research scientist: first, the authors introduce the scientific method and the hypothesis as a framework for developing conclusive experiments; second, the manual's experiments are designed to become increasingly complex in order to teach more advanced techniques and analysis; finally, gradually, the students are required to devise their own protocols. In this way, students and instructors are able to break away from a "cookbook" approach and to think and investigate for themselves. Suitable for lower-level and upper-level courses; Ninfa spans these courses and can also be used for some first-year graduate work.

Principles of Biochemistry With a human focus : study guide and problem book.
