Realme 3 is one of the most stunning smartphones in the budget segment and offers decent performance. The phone competes with a number of smartphones from Redmi, Samsung, and Asus in this price range.

Over the years the aim of the International Conference on Magnet Technology has been the exchange of information on the design, construction and operation of magnets for a variety of applications, such as high energy physics, fusion, electrical machinery and others. The aim has included advances in materials for magnet conductors, insulators and supporting structures. Since its inception the focus of the International Conference on Magnet Technology has gradually shifted to superconducting magnets. Now almost all papers are related to superconductivity. The 11th International Conference on Magnet Technology (MT-11) was organized by the combined efforts of the Institute of Electrical Engineers of Japan, the Association for Promotion of Electrical, Electronic and Information Engineering, and the Tokyo Section of the IEEE. The Conference was held at the Tsukuba University Hall, Tsukuba, Japan, from 28 August to 1 September 1989, courtesy of the University of Tsukuba. The Tsukuba University Hall was large enough to host invited talks, parallel sessions, poster sessions and industrial exhibitions. 461 participants from 19 countries registered for MT-11, and 280 invited and contributed papers were presented. The papers were reviewed not only by the Program Committee but also by foreign participants. Working sessions and social events were characterized by a truly international atmosphere. Scientific as well as cultural excursions were organized so that foreign visitors could experience the spirit of modern Japan. 26 companies, of which 8 were from Western countries, participated in the industrial exhibition which featured diverse products and services of interest to the magnet community.

You're excited to plant your first vegetable garden—but where to start? In *The First-Time Gardener: Growing Vegetables*, you'll find the answers you're looking for. Homesteader Jessica Sowards, the warm and energetic host of YouTube's *Roots and Refuge Farm*, is the perfect teacher for new gardeners, offering not just know-how but inspiration and time-management tips for success. Before you sink your hands into the soil, she'll answer all those questions rolling around inside your head: Where do I put my new garden? How do I prepare the soil? What vegetables should I plant? Is it better to start new plants from seed or should I buy transplants? What about watering, feeding, and taking care of my garden? What do I do if bugs show up? There are no stupid questions here. Everyone has to start somewhere, after all. Not only will you learn how to prepare, plant, and tend your first vegetable garden, you'll also learn: How to design an eco-friendly layout How to grow with the seasons How to maximize your harvest, even if you only grow in a small space Jessica wants your first food-growing experience to be a positive one, and she's prepared to go the distance to make sure tending the earth becomes your new favorite hobby. A single growing season is all it takes to fall in love with growing your own healthy, organic, nutrient-dense food. With Jessica as your guide, you'll soon discover all the satisfactions, challenges, and great joys of growing your own food garden. This book is part of *The First-Time Gardener's Guides* series from Cool Springs Press, which also includes *The First-Time Gardener: Growing Plants and Flowers*. Each book in *The First-Time Gardener's Guides* series is aimed at beginner gardeners and offers clear, fact-based information that's presented in a friendly and accessible way, including step-by-step instructions and full-color illustrations throughout.
