Some International Harvester 584 Tractors have a 4x2 2WD chassis, but there are also some with a 4x4 MFWD 4WD chassis, all equipped with hydrostatic power steering. They also have independent hydraulic wet disc brakes. The type 2 3-point hitch is very reliable, capable to lift 3600 lbs [1632 kg]. It is also worth noting that the independent rear PTO runs at 540 rpms.

Routledge Handbook of Tourism and Sustainability from C. Michael Hall, Stefan Gössling, Daniel Scott is one of the winners of the ITB BookAwards 2016 in the category Specialist tourism literature! Sustainability remains one of the major issues in tourism today. Concerns over climate and environmental change, the fallout from the global economic and financial crisis, and the seeming failure to meeting UN Millennium development goals have only reinforced the need for more sustainable approaches to tourism, however they be defined. Given the centrality of sustainability in tourism curricula, policies, research and practice it is therefore appropriate to prepare a state of the art handbook on the relationship between tourism and sustainability. This timely Handbook of Tourism and Sustainability is developed from specifically commissioned original contributions from recognised authors in the field, providing a systematic guide to the current state of knowledge on this area. It is interdisciplinary in coverage and international in scope through its authorship and content. The volume commences with an assessment of tourism's global environmental, e.g. climate, emissions, energy use, biodiversity, water use, land use, and socio-economic effects, e.g. economic impacts, employment and livelihoods, culture. This then provides the context for sections outlining the main theoretical frameworks and constructs that inform tourism and sustainability, management tools and approaches, and the approaches used in different tourism and travel industry sectors. The book concludes by examining emerging and future concerns in tourism and sustainability such as peak-oil, post-carbon tourism, green economy and transition tourism. This is essential reading for students, researches and academics interested in the possibilities of sustainable forms of tourism and tourism's contribution to sustainable development. Its assessment of tourism's global impact along with its overviews of sectoral and management approaches will provide a benchmark by which the sustainability of tourism will be measured for years to come.

In 1995, the International Committee of the Red Cross, along with a range of renowned experts, embarked upon a major international study into current state practice in humanitarian law in order to identify customary law in this area. This book (and its companion, Volume 1: Rules) is the result of that study. Volume 2 contains a summary of the relevant treaty law, international case-law and relevant state practice including legislation, military manuals, case-law, official statements, and official military practice for each aspect of humanitarian law. Top executives in international marketing and marketing professors give hands-on theoretical insights and practical guidelines for the most relevant problems in international marketing. The book is structured by easily accessible marketing catchwords and contains one in-depth, compact article per catchword.

This Manual provides the most up-to-date restatement of existing international law applicable to the conduct of air and missile warfare.

The focus of this manual is not what provisions to include in a given contract, but instead how to express those provisions in prose that is free of the problems that often afflict contracts.
