This brief text identifies the issues, resources, actors, and institutions involved in public policy making and traces the dynamics of the policymaking process, including the triggering of issue awareness, the emergence of an issue on the public agenda, the formation of a policy commitment, and the implementation process that translates policy into practice. Throughout the text, which has been revised and updated, Gerston brings his analysis to life with abundant examples from the most recent and emblematic cases of public policy making. At the same time, with well-chosen references, he places policy analysis in the context of political science and deftly orients readers to the classics of public policy studies. Each chapter ends with discussion questions and suggestions for further reading.

A new Strawberry Flavoured mouthwash causes a stir on the Wirral. Sales are through the roof but people are strangely falling ill. Scott Black from Dangerwatch investigates...

THE STORY: The first act is set in the fussily ornate apartment of Mendy, a ferociously dedicated opera buff who begs and cajoles his friend Stephen to let him borrow his copy of the pirated Maria Callas recording of La Traviata made during

As a young man, Rudyard Kipling was devastated when his military application was rejected because of poor eyesight. Although Rudyard would go on to win England’s highest accolades, he never got over this lost opportunity to serve his country. When World War I broke out, John, like his father before him, wanted to fight for his country. When his military application was threatened for the same reason as his father’s—poor eyesight—Rudyard took matters into his own hands. Determined not to let history repeat itself, the elder Kipling applied all his influence to get his son a commission. The teenager who had lived his life in comfort and whose greatest concern had been pleasing his father now faced a much greater challenge—staying alive in his first battle. Geert Spillebeen’s moving fictionalized account follows the true story of John Kipling, a young man whose desire to live up to the family name threatens his very survival. It also draws attention to the senseless suffering and loss of life in this and every war.

So much writing about architecture tends to evaluate it on the basis of its intentions: how closely it corresponds to the artistic will of the designer, the technical skills of the builder, or whether it reflects the spirit of the place and time in which it was built, making it not much more than the willful (or even subconscious) assemblage of objects that result from design and construction techniques. Renowned writer and thinker David Leatherbarrow, in this groundbreaking new book, argues for a richer and more profound, but also simpler, way of thinking about architecture, namely on the basis of how it performs. Not simply how it functions, but how it acts, "its manner of existing in the world," including its effects on the observers and inhabitants of a building as well as on the landscape that situates it. In the process, Leatherbarrow transforms our way of discussing buildings from a passive technical or programmatic assessment to a highly active and engaged examination of the lives and performances, intended and otherwise, of buildings.
