The M3 half-track was an American armored personnel carrier half-track widely used by the Allies during World War II and in the Cold War. Derived from the M2 half-track car, the M3 was extensively produced, with about 15,000 standard M3s and more than 38,000 variant units manufactured. The M3 was extensively modified with several dozen variant designs produced for different purposes. During World War II, the M3 and its variants were supplied to the U.S. Army and Marines, as well as British Commo

For the US Army of World War 2, the most important technical aspect of infantry mechanisation was the development of the M3 half-track personnel carrier. Steven Zaloga guides the reader through the early 1930s development of the half-track, its first deployment in action in the Philippines in 1941 and its varied and vital role in international deployments since World War 2.

The M16 Multiple Gun Motor Carriage, also known as the M16 half-track, was an American self-propelled anti-aircraft weapon built during World War II. It was equipped with four 0.5 inch M2 Browning machine guns in an M45 Quadmount. 2700 were produced by White Motor Company from May 1943 to March 1944, with 568 M13 MGMCs and 109 T10 half-tracks being converted into M16s as well. The chassis was derived from the T1E2 chassis, an earlier version of the M13. Based on an M3 half-track chassis, it repl

By 1940, the vehicle had been standardized as the M2 half-track car. The M2 design was recognized as having the potential for general mechanized infantry use, which spawned the larger bodied M3 half-track. Both the M2 and M3 were ordered into production in late 1940, with M2 contracts let to Autocar, White and Diamond T. The first vehicles were received by the Army in 1941.
