Microeconomics presents a complete discussion of microeconomic theory for those students who wish to gain an intermediate knowledge of the subject, but it is written in such a way that it is accessible to anyone who has no previous knowledge of microeconomics. A non-mathematical approach is used to explain basic principles as well as more advanced study material. The models are explained by means of diagrams. Theoretical analysis is done in explicit language and to the point discussions, and is augmented with practical examples and explanations. The attractive and functional layout makes the material clear and unimimidating. Each chapter is summarised and includes model questions.
