1929, 1968, and next around 2009? Are you aware that oil and commodity prices have peaked nearly every 30 years, as in 1920, 1951, 1980 -- and next likely around late 2009 to mid-2010? The three massive bubbles that have been booming for the last few decades -- stocks, real

Bestselling author and renowned economic forecaster Harry S. Dent, Jr., has observed these trends for decades. As he first demonstrated in his bestselling *The Great Boom Ahead*, he

downtrend for the global economy and individual investors alike. He predicts the following:

- The economy appears to recover from the subprime crisis and minor recession by mid-2009 -- "the calm before the real storm."
- Stock prices start to crash again between mid-

by late 2010, along with health care, and be the first great buy opportunities in stocks. • Gold and precious metals will appear to be a hedge at first, but will ultimately collapse as well after mid- to late 2010. • A first major stock rally, likely between mid-2012 and mid-2017, will be
