This exceptionally produced trainee guide features a highly illustrated design, technical hints and tips from industry experts, review questions and a whole lot more! Key content includes Introduction to the Trade, Trade Safety, Trade Tools and Equipment, Trade Math, Stationary Scaffolds, Mobile Scaffolds and Suspension Scaffolds.

This text provides total instruction in welding, other joining processes, and cutting that takes students from elementary procedures to technician skills. Based on the recommendations of the American Welding Society and other authorities, this text is accurate and thorough. Both the principles (why) and practice (how to) are presented for gas, arc, and semi-automatic welding, brazing, soldering, and plastic welding processes. The text offers comprehensive treatment of equipment, electrodes, typesof joints and welds, testing and inspection, metals and their welding characteristics, safety, and print reading. Photographs and drawings show the latest techniques and equipment. Course outlines are provided for each major process with emphasis on learning by doing.

Shielded Metal Arc Welding is a write-in text that progresses from basic theory to specialized techniques. It focuses on the shielded metal arc welding (SMAW) process. A unit on welding problems provides solutions that students can use when they encounter an issue. New and expanded contentupdated for this edition includes fire safety and protection; unclassified electrodes; welding positions; filler metal content; weld penetration; voltage polarity; low hydrogen electrodes; deposit rate; nondestructive testing; destructive testing; and the responsibilities of a weldinginspector.
