second part, 'Issues', then illustrates these various theoretical approaches against the backdrop of a diverse range of issues in contemporary security practices, from environmental, human and homeland security to border security, technology and warfare, and the War against Terrorism. This edition also includes new chapters on Constructivist theories (Part I) and health (Part II). The historical and geographical scope of the book is deliberately broad and readers are introduced to a number of key illustrative case studies. Each of the chapters in Part II concretely illustrate one or more of the approaches discussed in Part I, with clear internal referencing allowing the text to act as a holistic learning tool for students. This book is essential reading for upper-level students of Critical Security Studies, and an important resource for students of International/Global Security, Political Theory and International Relations.

This new textbook surveys new and emergent methods for doing research in critical security studies, thereby filling a large gap in the literature of this emerging field. New or critical security studies is growing as a field, but still lacks a clear methodology; the diverse range of the main foci of study (culture, practices, language, or bodies) means that there is little coherence or conversation between these four schools or approaches. In this ground-breaking collection of fresh and emergent voices, new methods in critical security studies are explored from multiple perspectives, providing practical examples of successful research design and methodologies. Drawing upon their own experiences and projects, thirty-three authors address the following turns over the course of six comprehensive sections: Part I: Research Design Part II: The

With the end of the Cold War, threats to national security have become increasingly non-military in nature. Issues such as climate change, resource scarcity, infectious diseases, natural disasters, irregular migration, drug trafficking, information security and transnational crime have come to the forefront. This book provides a comprehensive introduction to Non-Traditional Security concepts. It does so by: Covering contemporary security issues in depth Bringing together chapters written by experts in each area Guiding you towards additional material for your essays and exams through further reading lists Giving detailed explanations of key concepts Testing your understanding through end-of-chapter questions Edited by a leading figure in the field, this is an authoritative guide to the key concepts that you'll encounter throughout your non-traditional, and environmental, security studies courses.

This new textbook provides students with a comprehensive and accessible introduction to the subject of security studies, with a strong emphasis on the use of case studies. In addition to presenting the major theoretical perspectives, the book examines a range of important and controversial topics in modern debates, covering both traditional military and non-military security issues, such as proliferation, humanitarian intervention, food security and environmental security. Unlike most standard textbooks, the volume also offers a wide range of

case studies – including chapters on the USA, China, the Middle East, Russia, Africa, the Arctic, the Middle East, Europe and Latin America – providing detailed analyses of important global security issues. The 34 chapters contain pedagogical features such as textboxes, summary points and recommended further reading and are divided into five thematic sections: Conceptual and Theoretical Military Security Non-Military Security Institutions and Security Case Studies This textbook will be essential reading for all students of security studies and highly recommended for students of critical security studies, human security, peace and conflict studies, foreign policy and International Relations in general.

An Introduction to Strategic Studies addresses some of the major questions that govern both international relations and human survival. This book provides a comprehensive introduction to the core concepts of contemporary strategic thinking. It argues that strategic studies is about the impact of military technology on relations between states, and that its specialised contribution must always be seen within the broader context of international economic and political relations.

Focusing on critical approaches to security, this new textbook offers readers both an overview of the key theoretical perspectives and a variety of methodological techniques. With a careful explication of core concepts in each chapter and an introduction that traces the development of critical approaches to security, this textbook will encourage all those who engage with it to develop a curiosity about the study and practices of security politics. Challenging the assumptions of conventional theories and approaches, unsettling that which was previously taken for granted – these are among the ways in which such a curiosity works. Through its attention to the fact that, and the ways in which, security matters in global politics, this work will both pioneer new ways of studying security and acknowledge the noteworthy scholarship without which it could not have been thought. This textbook will be essential reading to advanced undergraduate and postgraduate students of critical security studies, and highly recommended to students of traditional security studies, International Relations and Politics.
