Feelings of oneness with others, nature, and the universe. Encounters with extraterrestrials, deities, and demons. Out-of-body experiences and past-life memories. Science casts a skeptical eye. But Dr. Stanislav Grof - the psychiatric researcher who co-founded transpersonal psychology - believes otherwise. When the Impossible Happens presents Dr. Grof's mesmerizing firsthand account of his fifty-year inquiry into waters uncharted by conventional psychology, an odyssey that will leave you questioning the very fabric of your existence. From the first LSD session that gave Dr. Grof a glimpse of cosmic consciousness to his latest work with Holotropic Breathwork, When the Impossible Happens explores fascinating experiments in astral projection; remarkable tales of synchronicity; memories of birth and prenatal life; the survival of consciousness after death, and much more. Here is an incredible opportunity to journey beyond ordinary consciousness - guaranteed to shake the foundations of what we assume to be reality - and sure to offer a new vision of our human potential, as we contemplate When the Impossible Happens. STANISLAV GROF, M.D., PH.D. One of the founders and chief theoreticians of transpersonal psychology, Dr. Grof is the president of the International Transpersonal Association, and a professor of psychology at the California Institute of Integral Studies and the Pacifica Graduate Institute. His numerous books include Beyond the Brain and Psychology of the Future.

Here Grof presents a useful model of the psyche—a model extended by his thirty years of studying non-ordinary states of consciousness. It is useful for understanding such phenomena as shamanism, mysticism, psychedelic states, spontaneous visionary experiences, and psychotic episodes. The model is also useful in explaining the dynamics of experiential psychotherapies and a variety of sociopolitical manifestations such as war and revolution. This book might have been entitled Beyond Drugs. The second part describes the principles and process of the non-pharmacological technique developed by the author and his wife, Christina, for self-exploration and for psychotherapy. Grof explores in detail the components of this technique. He describes its method, its effective mechanisms, as well as its goals and potential. Its practice is simple, since it utilizes the natural healing capacity of the psyche.
