Tales from the Great Divide is a story of challenge, of change but mostly of hope. It is the story of an immigrant Italian family and their first American born progeny living in the chaotic years of the middle part of the Twentieth Century. With humor, courage and grit they struggle to be American as the definition of American changes. In the end they come to define America as does every generation of immigrants who weave the brilliant threads of their ethnicity into the tapestry of this great nation. I am a Colorado native, born and raised in Denver. Today I live with my husband, two cats and sixties roses in the shadow of the Rocky Mountains where my heart and soul reside. I grew up in and around Denver's Little Italy and know the confusion and mystery of the immigrant experience well. This book is my journey from memory to meaning-a tribute to the immigrants I loved and admired.

Tales from the Great Divide is a story of challenge, of change but mostly of hope. It is the story of an immigrant Italian family and their first American born progeny living in the chaotic years of the middle part of the Twentieth Century. With humor, courage and grit they struggle to be American as the definition of American changes. In the end they come to define America as does every generation of immigrants who weave the brilliant threads of their ethnicity into the tapestry of this great nation.

The classic study of human nature which depicts the degeneration of a group of schoolboys marooned on a desert island.

Technology and increasing levels of education have exposed people to more information than ever before. These societal gains, however, have also helped fuel a surge in narcissistic and misguided intellectual egalitarianism that has crippled informed debates on any number of issues. Today, everyone knows everything: with only a quick trip through WebMD or Wikipedia, average citizens believe themselves to be on an equal intellectual footing with doctors and diplomats. All voices, even the most ridiculous, demand to be taken with equal seriousness, and any claim to the contrary is dismissed as undemocratic elitism. Tom Nichols' The Death of Expertise shows how this rejection of experts has occurred: the openness of the internet, the emergence of a customer satisfaction model in higher education, and the transformation of the news industry into a 24-hour entertainment machine, among other reasons. Paradoxically, the increasingly democratic dissemination of information, rather than producing an educated public, has instead created an army of ill-informed and angry citizens who denounce intellectual achievement. When ordinary citizens believe that no one knows more than anyone else, democratic institutions themselves are in danger of falling either to populism or to technocracy or, in the worst case, a combination of both. An update to the 2017breakout hit, the paperback edition of The Death of Expertise provides a new foreword to cover the alarming exacerbation of these trends in the aftermath of Donald Trump's election. Judging from events on the ground since it first published, The Death of Expertise issues a warning about the stability and survival of modern democracy in the Information Age that is even more important today.

Genre studies and genre approaches to literacy instruction continue to develop in many regions and from a widening variety of approaches. Genre has provided a key to understanding the varying literacy cultures of regions, disciplines, professions, and educational settings. GENRE IN A CHANGING WORLD provides a wide-ranging sampler of the remarkable variety of current work. The twenty-four chapters in this volume, reflecting the work of scholars in Europe, Australasia, and North and South America, were selected from the over 400 presentations at SIGET IV (the Fourth International Symposium on Genre Studies) held on the campus of UNISUL in Tubarão, Santa Catarina, Brazil in August 2007;the largest gathering on genre to that date. The chapters also represent a wide variety of approaches, including rhetoric, Systemic Functional Linguistics, media and critical cultural studies, sociology, phenomenology, enunciation theory, the Geneva school of educational sequences, cognitive psychology, relevance theory, sociocultural psychology, activity theory, Gestalt psychology, and schema theory. Sections are devoted to theoretical issues, studies of genres in the professions, studies of genre and media, teaching and learning genre, and writing across the curriculum. The broad selection of material in this volume displays the full range of contemporary genre studies and sets the ground for a next generation of work.

"This set of books represents a detailed compendium of authoritative, research-based entries that define the contemporary state of knowledge on technology"--Provided by publisher.

The public rely upon media representations to help interpret and make sense of the many complexities relating to climate science and governance. Media representations of climate issues ¶ from news to entertainment ¶ are powerful and important links between people's everyday realities and experiences, and the ways in which they are discussed by scientists, policymakers and public actors. A dynamic mix of influences ¶ from internal workings of mass media such as journalistic norms, to external political, economic, cultural and social factors ¶ shape what becomes a climate 'story'. Providing a bridge between academic considerations and real world developments, this book helps students, academic researchers and interested members of the public make sense of media reporting on climate change as it explores 'who speaks for climate' and what effects this may have on the spectrum of possible responses to contemporary climate challenges.

Jillian Cantor has a BA in English from Penn State University and an MFA from the University of Arizona. She is the author of award-winning novels for teens and adults, including, most recently, the critically acclaimedMargot, which was a Library Reads pick. Born and raised in a suburb of Philadelphia, Cantor currently lives in Arizona with her husband and two sons.

Stories about objects left in the wake of transactions, from cryptocurrencies to leaf-imprinted banknotes to records kept with knotted string. Museums are full of the coins, notes, beads, shells, stones, and other objects people have exchanged for millennia. But what about the debris, the things that allow a transaction to take place and are left in its wake? How would a museum go about curating our scrawls on electronic keypads, the receipts wadded in our wallets, that vast information infrastructure that runs the card networks? This book is a catalog for a museum exhibition that never happened. It offers a series of short essays, paired with striking images, on these often ephemeral, invisible, or unnoticed transactional objects/money stuff. Although we've been told for years that we're heading toward total cashlessness, payment is increasingly dependent on things. Consider, for example, the dongle, a clever gizmo that processes card payments by turning information from a card's magnetic stripe into audio information that can be read by a smart phone's headphone jack. Or dogecoin, a meme of a smiling, bewildered dog's interior monologue that fueled a virtual currency similar to Bitcoin. Or go further back and contemplate the paper currency printed with leaves by Benjamin Franklin to foil counterfeiters, or khipu, Incan records kept in knotted string. Paid's authors describe these payment-adjacent objects so engagingly that for a moment, financial leftovers seem more interesting than finance. Paid encourages us to take a moment to look at the nuts and bolts of our everyday transactions by looking at the stuff that surrounds them. Contributors Bernardo Bátiz-Lazo, María Bezaits, Finn Brunton, Lynn H. Gamble, David Graeber, Jane I. Guyer, Keith Hart, Sarah Jeong, Alexandra Lippman, Julien Mailland, Scott Mainwaring, Bill Maurer, Taylor C. Nelms, Rachel O'Dwyer, Michael Palm, Lisa Servon, David L.
