Life is indeed a game that we all play to pass time; simply a series of days strung together, made up of how you planned or decided to spend the moments. Like any game how well it is played or whether life's circumstances are interpreted accurately, then used to the best advantage, makes losers and winners to varying degrees. Senseless insanity is alive and well within the world. The world is awash with unruly forces, that if not intent upon harming you do desire to become a destabilising force, either temporarily or over the long term. We are all participants in a charade, how life evolves and turns out all depend on how well the game is played. It is not wise or ideal to treat life like a game of chance, a random roll of the dice that can determine unpredictable outcomes. The cost of success is the careful application of well thought out concepts and ideas. Like any game preparation is critical; understanding the rules, knowing how to manipulate the dynamics at play efficiently to ones own advantage, understanding the intricacies of the rules and how to capitalise upon or create opportunities, pursuing whatever circumstances are present to maximise whatever potential exists to the best advantage. The potential opportunities in life are only limited by the inability to firstly comprehend them and secondly to fully utilise personal abilities to maximise the potential that is available. Don't wait for special times to evolve, rather create them in accordance with your true desires to experience what you wish to make real. Much like any game, the game of life has things that can be obtained, or things that can be lost. How the game is played, the value of the stakes, the opposing factions all come to dictate an outcome, be that favourable or lacking any resemblance of being lucky. A life lived based upon any reliance on luck or fate being favourable is tempting only to the over optimistic, or those extremely lucky ones or who were fortunate in the past and believe that good fortune will continue in the future. While it takes resources to control the world, the control of your own specific world environment is really within your potential to achieve. How you choose to control your world, as well as to what extent your desires are put into action, determine whether your life will meet your wishes or not. The amount of thought and energy you exhort, the persistence of that effort, all comes to determine whether and to what degree what you want is what you actually get. In life you may win or loose at times, it's basically just like playing a game; the right mentality is chancing the wheel of life by trusting and ensuring you will win just the same.
