America will look to shore up support with Turkey, which ...

Christiana Figueres and Tom Rivett-Carnac--who led negotiations for the United Nations during the historic Paris Agreement of 2015--have written a cautionary but optimistic book about the world's changing climate and the fate of humanity. How all of us address the climate crisis in the next thirty years will determine not only the world we will live in but also the world we will bequeath to our children and theirs. The authors outline two possible scenarios for our planet. In one, they describe what life on Earth will be like by 2050 if we fail to meet the Paris climate targets. In the other, they lay out what it will be like to live in a carbon neutral, regenerative world. They argue for confronting the climate crisis headon, with determination and optimism. *The Future We Choose* presents our options and tells us, in no uncertain terms, what governments, corporations, and each of us can and must do to fend off disaster.

The stories in Laura van den Berg's rich and inventive debut illuminate the intersection of the mythic and the mundane. A failed actress takes a job as a Bigfoot impersonator. A grieving missionary becomes obsessed with a creature rumoured to live in the forests of the Congo. And, in the title story, a young woman travelling with her scientist mother in Madagascar confronts her burgeoning sexuality and her dream of becoming a long-distance swimmer. Rendered with grace and precision, this breathtaking collection is narrated by women yearning for absolution, for solace, for the flash of extraordinary that will forever alter their lives. 'Laura van den Berg taps into her characters' losses with an impressive clarity . . . These tales are the work of a notable author finding her voice.' - Publishers Weekly 'A young writer with talent to burn; the beauty of her writing is matched only by the fierce emotional empathy for her characters.' - The Courier-Journal

INSTANT WALL STREET JOURNAL BESTSELLER! "Bold, provocative...illuminates why we're having fewer babies, the middle class is stagnating, unemployment is shifting, and new powers are rising." -ADAM GRANT The world is changing drastically before our eyes--will you be prepared for what comes next? A groundbreaking analysis from one of the world's foremost experts on global trends, including analysis on how COVID-19 will amplify and accelerate each of these changes. Once upon a time, the world was neatly divided into prosperous and backward economies. Babies were plentiful, workers outnumbered retirees, and people aspiring towards the middle class yearned to own homes and cars. Companies didn't need to see any further than Europe and the United States to do well. Printed money was legal tender for all debts, public and private. We grew up

File Type PDF What The World Will Look Like When All Water Leaves Us Laura Van Den Berg

learning how to "play the game," and we expected the rules to remain the same as we took our first job, started a family, saw our children grow up, and went into retirement with our finances secure. That world—and those rules—are over. By 2030, a new reality will take hold, and before you know it: - There will be more grandparents than grandchildren - The middle-class in Asia and Sub-Saharan Africa will outnumber the US and Europe combined - The global economy will be driven by the non-Western consumer for the first time in modern history - There will be more global wealth owned by women than men - There will be more robots than workers - There will be more computers than human brains - There will be more currencies than countries All these trends, currently underway, will converge in the year 2030 and change everything you know about culture, the economy, and the world. According to Mauro F. Guillen, the only way to truly understand the global transformations underway—and their impacts—is to think laterally. That is, using "peripheral vision," or approaching problems creatively and from unorthodox points of view. Rather than focusing on a single trend—climate-change or the rise of illiberal regimes, for example—Guillen encourages us to consider the dynamic inter-play between a range of forces that will converge on a single tipping point—2030—that will be, for better or worse, the point of no return. 2030 is both a remarkable guide to the coming changes and an exercise in the power of "lateral thinking," thereby revolutionizing the way you think about cataclysmic change and its consequences.

"In 'What the World Will Look Like When All the Water Leaves Us', the story settings range from the Congo to Scotland to Madagascar to Manhattan's lower east side, and the stories are thematically linked by the incorporation of myths and legends." -- abstract.

Thirty years ago Bill McKibben offered one of the earliest warnings about climate change. Now he broadens the warning: the entire human game, he suggests, has begun to play itself out. Bill McKibben's groundbreaking book *The End of Nature* -- issued in dozens of languages and long regarded as a classic -- was the first book to alert us to global warming. But the danger is broader than that: even as climate change shrinks the space where our civilization can exist, new technologies like artificial intelligence and robotics threaten to bleach away the variety of human experience. Falter tells the story of these converging trends and of the ideological fervor that keeps us from bringing them under control. And then, drawing on McKibben's experience in building 350.org, the first truly global citizens movement to combat climate change, it offers some possible ways out of the trap. We're at a bleak moment in human history -- and we'll either confront that bleakness or watch the civilization our forebears built slip away. Falter is a powerful and sobering call to arms, to save not only our planet but also our humanity.

The novel's protagonist is a British Roman Catholic priest, Father Percy Franklin, who looks identical to the mysterious U.S. Senator

File Type PDF What The World Will Look Like When All Water Leaves Us Laura Van Den Berg

Julian Felsenburgh of Vermont. The senator appears as a lone and dramatic figure promising world peace in return for blind obedience. No one quite knows who he is or where he comes from, but his voice mesmerizes. Under his leadership, war is abolished. Felsenburgh becomes the President of Europe, then of the world, by popular acclaim. Everyone is fascinated with him, yet still no one knows much about him. People are both riveted and frightened by the way he demands attention. Most follow without question. Having been a close observer of President Felsenburgh's rise, Father Franklin is called to Rome, a Hong Kong-style enclave ruled by Pope John XXVI and raised to the College of Cardinals. Meanwhile, defections among bishops and priests increase. At Cardinal Franklin's instigation, the pope abolishes the Eastern Catholic Churches and forms a new religious order, the Order of Christ Crucified. All its members, including the Pope, vow to die in the name of the faith.

As the world's economies shift, some countries will succeed and some will fail. Understanding the reasons - and which countries will emerge as the most powerful over the next generation, affects all our futures.

When a young peasant girl is injured while hunting, she meets a strange, magical man who is a member of a despised race - Mujar. Truemen scorn the shape-shifting unmen for their odd, humble ways, and envy their power over the elements. Mujar do not use their powers for good or evil, they simply exist, immortal and apparently purposeless. Now a scourge is sweeping the land, armies of mounted warriors who cannot be defeated are wiping out Truemankind without mercy. They are known as the Black Riders, but no one knows where they come from or why they seem bent on exterminating every man, woman and child. Talsy traps the Mujar with gold, which has an odd effect on them, to make him help her, but her father intends to throw him in a Pit, from which he will be unable to escape. Talsy does not believe the Mujar deserves such a fate, so she frees him and begs him to take her with him on his journey. He agrees, and they set off across Shamarese, continuing his quest to find an old hermit's lost son. There is far more at stake than Talsy realises, however, and she has innocently stumbled upon the last free Mujar, who has the power to decide the fate of her race.

In 1907 and again in 1908 Adolf Hitler applied for entry at the Academy of Fine Arts in Vienna. He was rejected on both occasions - a professor citing "unfitness for painting." It seems that this decision has been deemed by many historians as not a significant event. But what if Adolf Hitler had been accepted to the prestigious Academy of Fine Arts? Prior to this rejection, Adolf had sold some of his paintings so it would not have been unthinkable for him to have been accepted. Some have thought that perhaps he had been rejected by Jewish professors and so began his hatred of the Jews. Again, we have to think about what if Adolf Hitler had been accepted in the Academy of Fine Arts? Would that have change his path and therefore changed

File Type PDF What The World Will Look Like When All Water Leaves Us Laura Van Den Berg

the course of history? Would someone else have simply taken his place? "The Artist Formerly Known as Adolf Hitler," is a novel that looks at what the world may have looked like had he chose a different course in life. For many people, the name Adolf Hitler is the embodiment and true definition of evil. The purpose of this book is not to venerate Adolf Hitler. This story is meant to have the reader think in a different way about Adolf Hitler. Was Adolf Hitler predestined to be the architect of one of the most horrendous and evil events in modern history, or was it simply a series of bad choices and decisions and eventually choosing the wrong course in life? There is evidence that in Adolf Hitler's youth, he had many interactions with Jewish people and in some cases, quite beneficial ones. What were those events or interactions that shaped his opinions to become drastically different in later life? What if we had to walk a mile in Adolf Hitler's shoes? Many find such a thought preposterous. But what if we had his formative years? What if we had his physiology? What if we had the same path and obstacles to go down or around as he? Would we make the same decisions? While we may judge people like Hitler, Stalin and Mao as ruthless and evil dictators, had we been born to live their lives, would we have made different choices while in their shoes? To this point, are all human beings just subject to their predestined fate, or do we all the unfettered opportunity to make the correct or incorrect choices that lead us down a certain path? Another aspect of this novel looks at how the 20th century would have transpired, had Adolf Hitler chosen another path. Is it likely World War II would have occurred? If it hadn't what would the world look like? The war was directly responsible for the economic upturn for the United States and many countries, lifting them from the malaise of the Great Depression. What would have become of the Soviet Union? Would we have landed a man on the moon? The war brought about economic, political and technological changes to an extent that had never been experienced before in history. What would this have meant for the Jewish race as well as all people all around the world? The book also looks at what might have happened to some notable people affected directly or indirectly by Adolf Hitler had he lived his life differently. What might have happened to the political careers of Rosa Luxemburg and Karl Leibknect? What might have happened to Ann Frank? Who was Ernst Thallman and MarIa de los Remedios Alicia Rodriga Varo y Uranga? What is amazing to think in terms of, is that how could the decisions of one man have made such a dramatic impact on the history and culture of the world that we live in today. "The Artist Formerly Known as Adolf Hitler" will make you rethink history and how our behavior can impact not only the lives of our small communities, but the entire world.
