Darwin's Cathedral: Evolution, Religion, and the Nature of Society (ISBN 9780226901350) is a 2002 book by David Sloan Wilson which proposes that religion is a multi-level adaptation—i.e., a product of cultural evolution developed through multi-level selection. Reception

Darwin's Cathedral - Wikipedia

Evolutionary biologist David Sloan Wilson argues in his book Darwin's Cathedral that religion served as a social tool to unite groups into cohesive wholes by which they could out compete groups without religion, and thus the religious impulse was born.

Unmasking Darwin's Cathedral: It's Not Just About Religion

When Charles Darwin declared that Homo Sapiens are just another species of animals, many people especially from the church fought against the idea. He first started saying that humans are on the evolutionary tree. This is his tree diagram that shows which animals evolved from which, in his first evolutionary book, On the Origin of Species.

Darwin's Theory's Conflicts With Religion - Charles Darwin ...

However, if like me you find the phenomenon of religion fascinating, then you will find 'Darwin's Cathedral' engaging and thought provoking. I found myself coming out of the book with a new found respect for the incredible complex constructs that religions are, though even more amazed by the power of evolutionary processes.

Darwin's Cathedral - Science Brainwaves

Darwin was a natural science graduate of Cambridge University and a geologist. He was also a Christian. Darwin did not intend to challenge religious beliefs with his book but many religious...
