Ecosystem services: From concept to practice | Request PDF

Ecosystem services are the many and varied benefits to humans gifted by the natural environment and from healthy ecosystems. Such ecosystems include, for example, agroecosystems, forest ecosystems, grassland ecosystems and aquatic ecosystems. These ecosystems, functioning in healthy relationship, offer such things like natural pollination of crops, clean air, extreme weather mitigation, human mental and physical well-being.

Ecosystem service - Wikipedia

What are ecosystem services? Ecosystems are communities formed by the interaction between living (plants, animals, microbes) and non-living organisms (air, water, mineral soil). Human beings are both part of ecosystems and benefit from ecosystems in many ways. The benefits are known as ECOSYSTEM SERVICES.

What are ecosystem services? | Water, Land and Ecosystems

The value of nature to people has long been recognized, but in recent years, the concept of ecosystem services has been developed to describe these various benefits. An ecosystem service is any positive benefit that wildlife or ecosystems provide to people. The benefits can be direct or indirect—small or large. Types of Ecosystem Services

Ecosystem Services | National Wildlife Federation

The value of nature to people has long been recognized, but in recent years, the concept of ecosystem services has been developed to describe these various benefits. An ecosystem service is any positive benefit that wildlife or ecosystems provide to people. The benefits can be direct or indirect—small or large. Types of Ecosystem Services

Applying the Ecosystem Services Concept to Public Land ...

Adoption of the ecosystem service concept by the Forest Service is one part of an emerging "all lands" approach to landscape management that seeks to administer public lands for their various ecosystem service benefits while providing incentives for supplemental management activities on private land that can augment efforts to manage public land (USDA Forest Service 2006, Collins and Larry 2007).

Ecosystem Services | TEEB

Ecosystem Services develops shared approaches and scientific methods to achieve knowledge-based sustainable planning and management of ecosystem services. Professionals engaged in ecosystem service implementation have two options: de-emphasize the ecological and socioeconomic complexity and advance in the theoretical, abstract field, or try to develop research that is policy relevant and inclusive in an uncertain environment.

Ecosystem Services - 1st Edition

Biodiversity is central to the production of ecosystem services: it is the direct source of services, such as food and fibre, and underpins others, such as clean water and air, through the role of organisms in energy and material cycles. This paper provides an overview of the concept of ecosystem services and how they are valued.
