Final Exception

The blank final, which was introduced in Java 1.1, is a final variable whose declaration lacks an initializer. Previous to Java 1.1, a final variable was required to have an initializer. A blank final, by definition of "final", can only be assigned once. i.e. it must be unassigned when an assignment occurs.

final (Java) - Wikipedia

Overview. Today, Treasury released Final Regulations and Proposed Regulations under Section 954, and Section 951A as enacted by the 2017 tax reform legislation (the Act). These regulations relate to the treatment of income that is subject to a high rate of foreign tax under the global intangible low-taxed income (GILTI) and subpart F income regimes.
