Ford Engines - Ford Kent Crossflow engine (1959-1984)

This engine was introduced in the Ford Mk2 Cortina and differs from the earlier units by having the carb on the left and the exhaust on the right - hence, 'crossflow.' They also varied from Pre-X/Flows in that the combustion chamber was shifted from the head to the bowl of the piston and were know as BIP engines (Bowl In Piston).

ford 1600 kent engine for sale | eBay

You could argue that a Kent engine is a Kent engine whether in Crossflow or Pre-Crossflow form, but if you're after period correctness then the later engine doesn't really look right. The issue is, if you want lots of performance, the Pre-Crossflow's maximum standard capacity is a mere 1498cc, or 1558cc if you use a Lotus configuration.

180 degs out maybe! The rotor arm moves anti clockwise. When I got my engine started, had the firing order wrong, but soon sorted that out. Apart from that, the engine fired straight away. It sounds like ignition timing, if you have set the rotor arm to point to No1, get someone to crank the engine and move the dist until a little until it fires.

The first 1600cc Kent engine is sometimes called a "Cortina" because it was first used in the 1967 Ford Cortina. It is also called "crossflow" (or X-Flow) because this was the first member of the Kent family with a cross-flow cylinder head (earlier Kent engines had the intake sitting directly over the exhaust).
