This page was originally intended to harbor a student-version of the module detail page, but the current module detail page JSP handles all user cases, and indeed this page uses that same template. This page is still used by the Fishbowl portlet when accessing modules from the foss-modules page in a not logged in state, student role.

### **Student Module Detail - FOSS**

Students make mixtures of water and solid materials and separate the mixtures with screens and filters. They find that water and salt make a special kind of mixture, a solution, which cannot be separated with a filter but only through evaporation. Students are challenged with a problem: how to separate a mixture of three dry solid materials.
