4. Statistical data on the role of women in farming are still scanty. The study contributes to this by providing information about women in these villages. 5. The study may shed some light on how family structure, family dynamics, skills and resources may affect women's participation in decision making.

The role of women in agricultural production and household ...

51. Gender participation of women and men calculated on the basis of total percentage women hours in different crops showed that women's participation in rice based cropping system was 44.5 per cent followed by finger millet (43.1%), vegetables (36.9%) and wheat (32.4%). Gender participation (%) in different crops in Madhya Pradesh.

Gender issues in ricefarming_crrl - SlideShare

Female smallholder rice farmers face many challenges. Women in rural areas are the main producers in agriculture, but they do not benefit from what they produce due to traditional values that keep women from fully taking part in decision making, controlling and accessing finance and resources. Empowerment of Women Farmers in the Rice Value Chain is a 3 year Balancing Benefits project targeting 15,000 female smallholder rice farmers in four regions in Tanzania.

In March 2017, IFPRI's Development Strategy and Governance Division (DSGD) published a discussion paper about changing gender roles in agriculture, based on an analysis of 20 years of data from Ghana. In this blog, Monica Schuster, a post-doctoral research fellow at the Institute of Development Policy of the University of Antwerp, Belgium, and Isabel Lambrecht, a research fellow in IFPRI's ...

Gender roles in agriculture: Did anything change?

comparative gender analysis in value chains is the use of descriptive case studies and the growing literature that describes the gender dynamics in value chains reflects this (e.g. Laven et al., 2009).

Gender and agricultural value chains

Men do most of the heavy work in rice farming and women assist in all farm activities. Men's contribution in rice farming exceeds women's because women also have reproductive roles and household responsibilities. Both genders participate in decision-making but men's decisions always prevail. K. Sri Lanka. Rose Rupasinghe Samuel

Report of the regional consultation on gender dimensions ...

In Asian countries, women may have been traditionally socialized into rice production since time immemorial considering the fact that rice is a traditional crop. Mosen (1991) adds that though rice production has been largely feminized in S.E Asia, men and women play equal role in intensive irrigated agriculture.
