Hurricane Storm Damage Reduction System

Hurricane Storm Damage Risk Reduction System. After Hurricane Katrina, the U.S. Army Corps of Engineers constructed the \$14.5 billion Hurricane and Storm Damage Risk Reduction System (HSDRRS). It is one of the most technically advanced coastal flood protection systems in the world.

Together, this system of barriers, sector gates, floodwalls, floodgates and levees provide a veritable "wall" around East Jefferson (EJLD), Orleans (OLD) and St. Bernard Parishes (LBBLD).
