Metadata Solutions Using Metamodels Repositories Xml And ...
API-driven access—Tools, applications, or other software use metadata solution-specific APIs to get to the stored metadata. Remote procedure calls (RPCs)—From a reverse point of view, the metadata solution uses procedures inherent to the "keepers of the metadata," so to speak, as a means of retrieving metadata from its resting place. Typically, metamodels in this scenario need to accommodate the location and access procedures associated with each metadata source that falls within the ...
