Omc cobra overheating mystery solved once and for all

The Mercruiser stern drive is one of the most popular marine propulsion systems on the water. It is reliable and usually the annual maintenance performed during winter layup will prevent overheating problems. But when things do go wrong with the cooling system, the Mercruiser is easy to troubleshoot and repair. This ...

How to Troubleshoot an Overheating Mercruiser 5.0L | Gone ...

Those 3 cylinder 60's and 70's had service bulletins back in the early '90s to help overheating problems. Be sure to use the complete factory water pump kit as it is a high-flow design and comes with the fittings to reposition the water tell-tale from the side of the exhaust cover to the top of the exhaust area.

Evinrude outboard forum for problems and answers

I have a 1989 OMC Cobra 4.3L stern drive. I am experiencing an over heating problem (I never let it get past 200) and have done the following: Checked impellor and it looked brand new. Checked flow from water line to thermostat (from impellor) and was flowing well while idling. Checked Thermostat housing for blockages and installed new thermostat.

The OMC factory engineering/service department has researched and said that the AVERAGE outboard will be used only about 15 hours a year according to one of their studies. However there is documented usage of a 1988 6 hp Johnson purchased new and being used a estimated total of 1200 -1700 hours of trolling time using 100:1 mix.

OMC Fuel Ratio Controversy 1985- - LeeRoy's Ramblings

This Service Bulletin just says to install the latest ESA (Electronic Shift Assist) module. When OMC converted from a two-degree clutch dog to a five-degree, the dog was more reluctant to disengage. The new ESA makes the engine idle slower and weaker to make disengagement easier.

OMC Cobra Sterndrive Tech Info

Incidentally, from 1993 to 1998 or so Volvo supplied both engines and sterndrives to OMC. The drives were branded OMC Cobras but were really manufactured by Volvo. These engine models had a two-digit number and followed by a string of letters to identify the year and model. For example a4.3GLPNCA is 4.3 liters, and the:
