Sound Waves Reading Passage Worksheets & Teaching ...

Answer: Sound is produced when something vibrates. The vibrating body causes the medium (water, air, etc.) around it to vibrate. Vibrations in the air are called travelling longitudinal waves, which we can hear. Sound waves consist of areas of high and low pressure called compressions and rarefactions, respectively.

Study of sound mechanical waves - CodyCross Answers All ...

Sound waves travel through the air. Sound waves are caused by vibrations. Since air is made of particles (matter), it transports sound very well. When a speaker vibrates it creates longitudinal waves that travel in ALL directions. You can easily see how speakers create vibrations by sprinkling something small and light, like salt, onto a speaker.
