is make one business into a monopoly and get rid of the others.

Lesson Title: “Monopolies: More than just a game

$\$62.50 = \25.00 . The marginal revenue of the third unit is the sum of these two effects = $+\$62.50 - \$25.00 = +\$37.50$. Because the firm cannot sell 3 units at the same price at which it sold 2 units, the price of the third unit is greater than the marginal revenue from that unit. SOLUTIONS ACTIVITY 3-10 (CONTINUED)

However, different markets have different characteristics, and in some markets there may be only one or a few firms. In this lecture, we begin to learn about the operations of a monopoly market, where only one firm is producing a given good. The game Monopoly is named after the economic concept, in which one firm dominates an entire market.
